THE GRIP COLLECTION

PLA · ONE COLOUR · ABOUT 50 G

Ten grips.
One perfect fit.

Ten 3D-printed grip sleeves for your pickleball paddle: one shape underneath, ten different surfaces on top. Print each in one solid PLA colour.

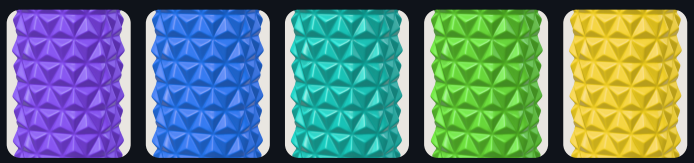

THE HANDLE

A sleeve that slides over your paddle's flat handle: a 30.2 × 16.2 mm slot (the measured 30 × 16 mm tongue plus 0.2 mm), closed at the butt with a countersunk 3.5 mm hole so an M3 flat-head screw sits flush. About 1.2 mm of solid wall all round a sealed hollow core keeps it near 50 g. The fit is identical on all ten designs, only the surface changes, so you can swap textures freely.

50–54 g	100 %	Ø 3.5 mm	1 colour
PER GRIP, PLA	INFILL	SCREW HOLE	PLA, NO SWAPS

CHOOSE YOUR COLOUR

The whole grip prints in one solid colour. Shown: Tessel-Block, mid-grip.

Ultraviolet	Court Blue	Teal	Pickle Green	Citrus Yellow
#7B4DDB	#2F6FDB	#1FA59B	#5DB83A	#EBCB2E

Sunset Orange	Signal Red	Arctic White	Slate Grey	Jet Black
#F08A24	#D7262E	#ECECE9	#6B7480	#1C1E22

Renders of the print files. Colours are typical PLA filament shades; your spool may differ slightly. Designed to print upright, without supports.

Ten ways to hold on.

Two views and a close-up of every design, shown as it prints: one PLA colour, no paint, no multi-colour swaps.

WHERE THE IDEAS COME FROM

Each design borrows a pattern from somewhere else: braided rope, brickwork, cut gemstones, jigsaw pieces, neural networks, carbon cloth, dragonfly wings, contour maps, river pebbles and honeycomb. Every one is real 3D relief, so it reads in a single colour through light and shadow, and you feel it in the hand.

01 VORTEX GRIP

Braided rope and woven straps: crossing strands that bite into the palm from every angle.

52.1 g · Ultraviolet

02 CELLULAR MOD

Brickwork and stacked stone: staggered cells, with a few recessed pockets for optional inserts.

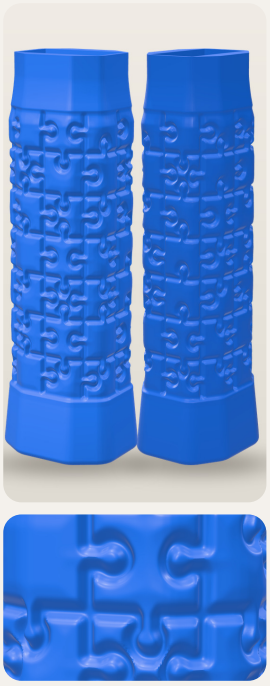

52.6 g · Arctic White

03 TESSEL-BLOCK

Cut gemstones and folded paper: faceted pyramids that catch the light and the fingertips.

52.2 g · Sunset Orange

04 LOGIC-GRIP

Jigsaw puzzles: interlocking pieces with mushroom knobs, every row locked to the next.

53.8 g · Court Blue

05 NEURO-TREAD

Neural networks: nodes joined by curved ridges that rise above a field of fine bumps.

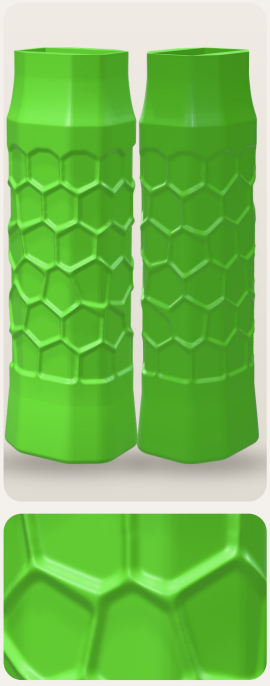

52.5 g · Signal Red

06 CARBON MATRIX

Carbon-fibre cloth: a real over-under twill, the finest texture in the set, with smooth patches.

51.2 g · Jet Black

07 VORONOI-CORE

Dragonfly wings and cracked earth: a lattice of rounded ribs around recessed cells.

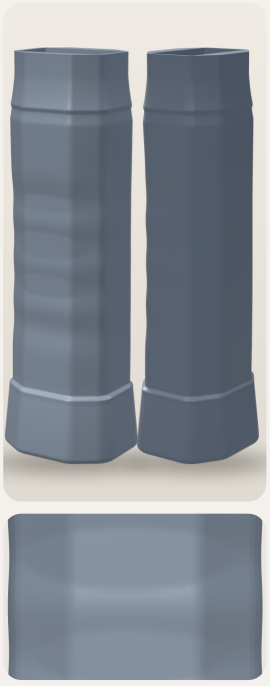

53.7 g · Pickle Green

08 TOPO-FLOW

Contour maps and tree rings: flowing ridges that wrap the handle around four wood-grain knots.

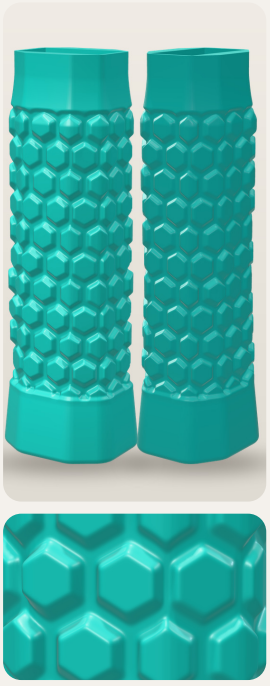

52.6 g · Citrus Yellow

09 ERGO-CONTOUR

A river-worn pebble: a smooth swell with finger flutes and a thumb rest shaped for the hand.

50.3 g · Slate Grey

10 HEXA-MOD

Honeycomb: individual hex pads on four height levels, a pattern you can feel as well as see.

52.3 g · Teal

Every design prints in any of the ten PLA colours on page 1. 100 % infill · 0.20 mm layers · printed upright, butt end down.
