| ITEM                                                                                                                                                               | PART                                                     | QTY (4-car) | PRINT           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|-------------|-----------------|
| 1                                                                                                                                                                  | Wall strip 30 x 6 x 400 (or 2 halves, C-interlock)       | 1           | flat, back down |
| 2                                                                                                                                                                  | Hinge clip, depth j = 0..3 (one each)                    | 4           | standing        |
| 3                                                                                                                                                                  | Ledge 128.6 long, 1.8 mm card slot                       | 4           | standing        |
| 4                                                                                                                                                                  | Lock pin 3 x 3 mm (one per clip, stops the clip lifting) | 4           | flat            |
| Kits: 2-7 cars on one 40 cm strip (54 mm apart). 14 cars: second strip 491 mm higher, clips j0-j6 again.<br>Strips join with the C-interlock; clips need no tools. |                                                          |             |                 |

OPERATION SEQUENCE

how the product works

1 SCREW THE STRIP

3 countersunk screws; hook lips face up

2 HANG THE CLIP

drop it on the lip pair: 2 L-hooks catch

3 DROP THE LEDGE ON THE PIN

it clicks shut on the detent bump

4 LIFT 1 mm, SWING 10-40°, SLIDE CARD IN

close it: the solid block stops it at 0°

## 1 WALL STRIP

**DETAIL B** hook lip. 45° fillet for flat printing (3:1)

### DETAIL C C-interlock of the 2-piece strip (2:1)

## 2 HINGE CLIP (depth $j = 0$ shown)

| j | pin from strip | block depth |
|---|----------------|-------------|
| 0 | 18.7           | 5.4         |
| 1 | 25.7           | 11.3        |
| 2 | 32.7           | 11.3        |
| 3 | 39.7           | 11.3        |
| 4 | 46.7           | 11.3        |
| 5 | 53.7           | 11.3        |
| 6 | 60.7           | 11.3        |

### 3 LEDGE

**SECTION D-D (3:1)**

back wall 19, front lip 1, front corner posts 14

## HINGE FUNCTION

section through the pin axis, 2:1 · ledge closed / lifted & opening

## NOTES

1. Card: ~105 x 165 mm, 1.2 mm thick, blister up to 42 mm. Slot 1.8 mm.
2. Clip: double L-hook - fingers behind both lips of a pair; cheeks stop twisting.
3. Ledge rests on the wide footing; the solid block stops it at 0°, bump holds it closed.
4. To load: open the ledges above, lift 1 mm, swing 10-40°, slide card down.
5. No supports: strip flat (back down), clip & ledge standing.
6. Fit verified on the CAD model by boolean collision checks (hang, lift-off, swing, stop, card loading, strip joint). Print tolerances may need tuning.
