

SlideRack Wall

Six carded cars on a 13 × 45 cm strip of wall. Cards slide in from the side and swap in seconds. Add clip-on feet and the same rack stands on a desk.

Left: on the wall with six cards. Right: the same rack on its clip-on table feet.

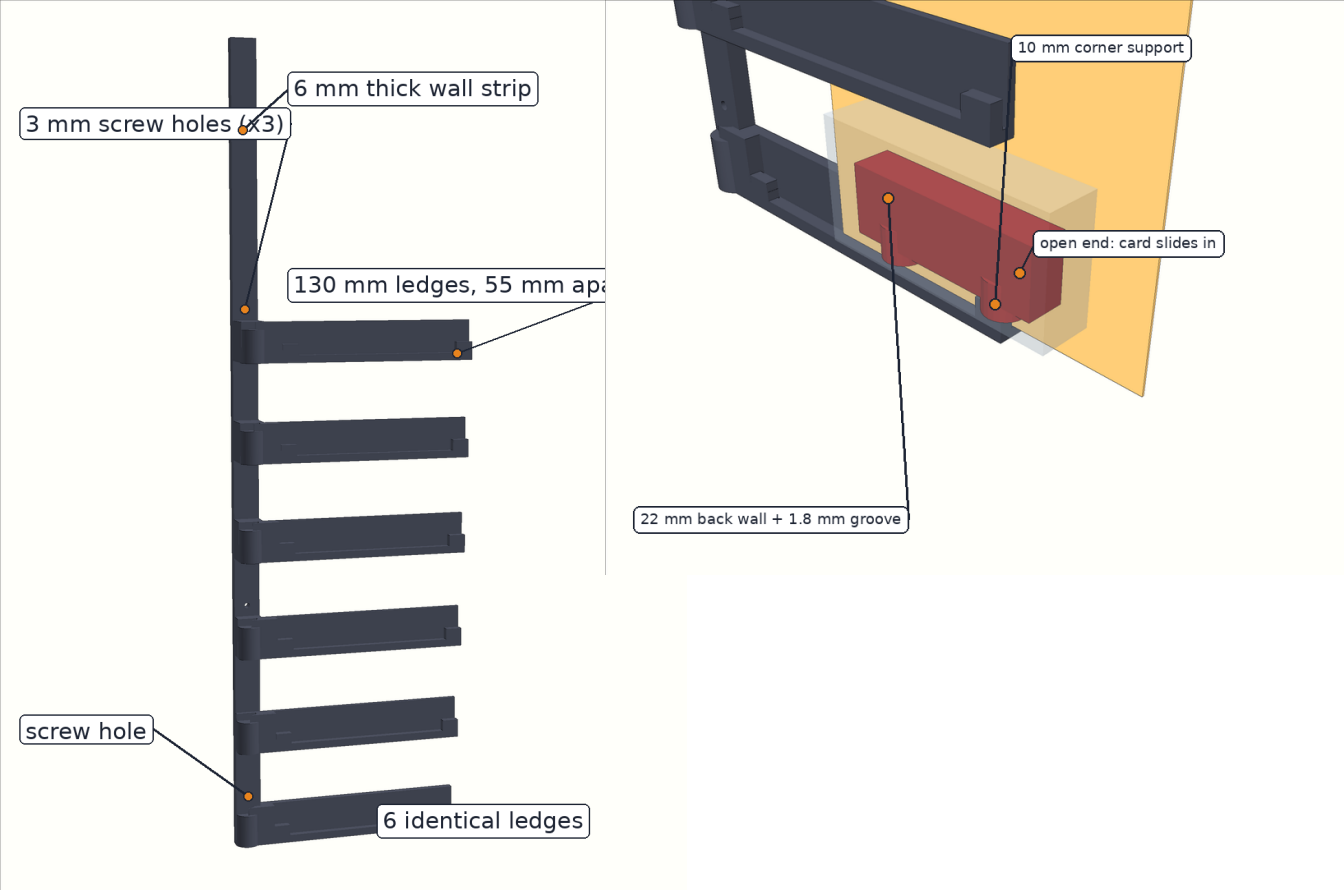

Why collectors want it

- Keeps cars carded. The card stands in a groove along its full width, with 10 mm supports at both corners. Nothing clips, presses or bends the card.
- Side loading. Slide a card in from the open end and it stops at the closed end. Swapping a car takes seconds, with no case to open.
- Three times denser. Each card tucks behind the ledge above, so the car and its name show in just 55 mm of wall height (a card is 165 mm).
- Wall or desk. The same rack screws to the wall (3 screws) or drops into two clip-on feet.

The range

Product	What you get	Price
SlideRack Wall 6	six-card wall rack, 3 screw holes	₹499
Wall 6 + Table Feet	rack + clip-on feet for desk use	₹699
Table Feet (add-on)	turns an existing rack into a stand	₹199
SlideRack Wall Pro	every ledge swings out on a print-in-place hinge, with a stop and snap detent	₹749

Design

Left: the rack with its main features. Right: one ledge close up, with a card halfway in.

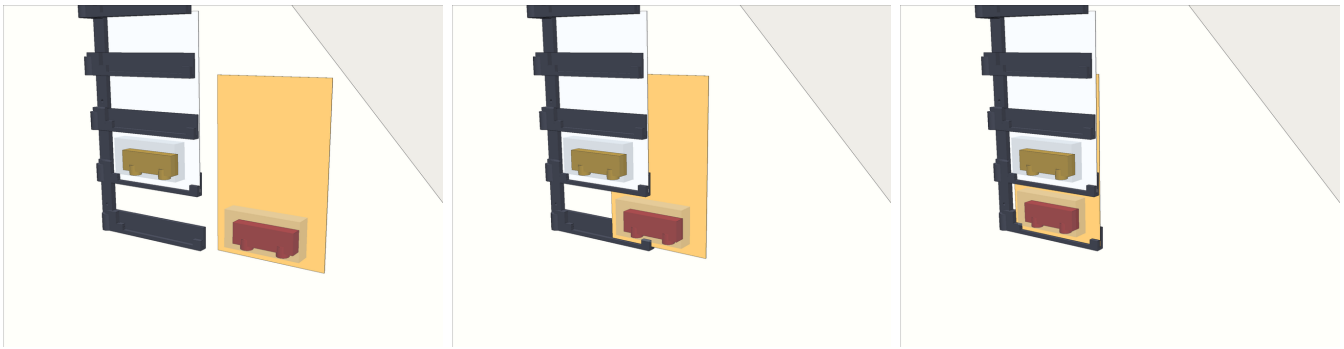

Design details

- One ledge profile, six times. Each ledge has a 22 mm back wall, a 1.8 mm card groove, a 4 mm front lip and two 10 mm corner supports. Ledges are 130 mm long for a 108.3 mm clear groove, which fits the standard 108 × 165 mm card fully.
- Shingled tiers. Each ledge sits 55 mm higher and 4.6 mm further out than the one below, so each card passes 0.4 mm behind the next ledge.
- Strong mount. A 6 mm wall strip with three 3 mm screw holes. All the load goes into the wall through the strip.
- Made to print at home. One piece with no supports. It was refined over several test prints: ledge length, corner-support height and hole size all came from real measurements.

Specification	Value
Overall size	130 × 449 × 34 mm (W × H × D)
Capacity	6 standard carded cars
Material and mass	PLA, about 116 g printed
Mounting	3 × 3 mm screws (M3 / #4), 6 mm strip
Table feet	2 clip-on feet, 195 mm deep; tips at 30.0° forward with 6 cards

How it works

Load a card: slide it in from the side

1. Line the card up with the open end of the ledge. 2. Slide it along the groove; the corner supports guide it. 3. It stops against the closed end, fully seated.

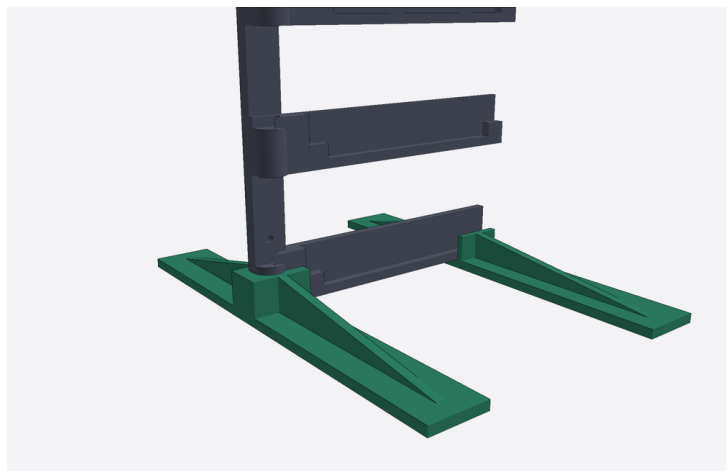

Put it up, or put it on a desk

On the wall

- Mark the three holes with the strip held level.
- Drive three 3 mm screws; their heads sit on the 6 mm strip.
- Slide in up to six cards from the bottom up.

On a desk

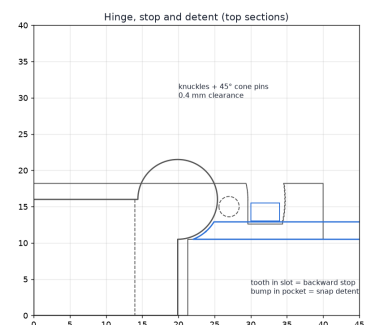

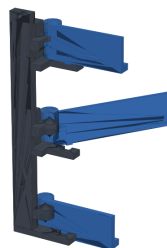

- Set the two clip-on feet on the table.
- Drop the rack in: the spine into the socket, the bottom ledge into the cradle.
- The 2.6 mm end stop sits below the groove floor, so cards still slide in from the side.

Upgrade: SlideRack Wall Pro (hinged)

Every ledge swings out on its own print-in-place hinge, which makes it easier to reach and clean behind. The ledge weight rests on the fixed knuckle and a shelf, so the load still goes into the wall. A tooth-and-slot stop keeps the ledge from closing backwards, and a 0.6 mm bump in a pocket snaps it shut. It prints fully assembled.

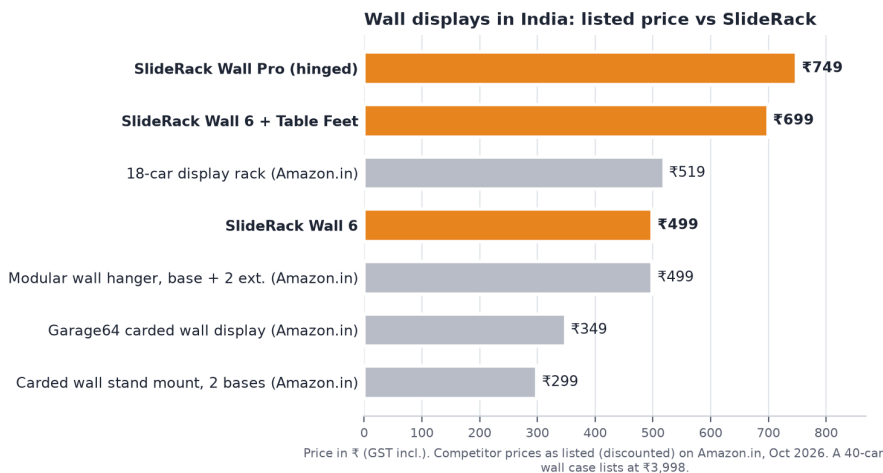

Print-in-place hinge: ledge 2 swung out 55°

Indian market and pricing

Where it fits

- A growing collector base. Collector stores report 1,000+ buyers across Mumbai, Delhi, Bangalore and Chennai, and analysts rank India among the fastest-growing diecast markets (about 7.4 % CAGR to 2034 for the region).
- Current choices are basic. Carded wall hangers on Amazon.in sell for ₹299–₹519 and mostly hold cards on thin strips or by the hang tab. Acrylic cases cost ₹3,998 or more.
- SlideRack Wall sits at ₹499: the top of the hanger range, justified by full-width card support, side loading, three-times density and the desk option.

Pricing and margin per unit

Product	Price (incl. 18% GST)	Print time*	Unit cost*	Profit direct (D2C)	Profit on Amazon / Flipkart
SlideRack Wall 6	₹499	4.7 h	₹198	₹115 (27%)	₹50 (12%)
Table Feet (pair, add-on)	₹199	2.0 h	₹121	₹44 (26%)	₹18 (11%)
Wall 6 + Table Feet bundle	₹699	6.7 h	₹320	₹158 (27%)	₹68 (11%)
SlideRack Wall Pro (hinged)	₹749	5.2 h	₹220	₹300 (47%)	₹202 (32%)

*Model assumptions: PLA at ₹900/kg (Indian retail ₹699–₹965/kg); printed mass 75 % of the solid model (3 walls, 15 % infill); 25 g/h print rate; machine cost ₹12/h (power + wear); finishing ₹20/part; 10 % waste allowance; packaging ₹30 and shipping ₹70 per order (add-ons ship free with a main item); payment gateway 2 % (D2C) or 15 % all-in marketplace fees; GST 18 % (HSN 3926 under GST 2.0). Profit is after GST, fees, shipping and unit cost.

How to sell it

- Instagram + WhatsApp (D2C): short reels of a card sliding in and the 3-second swap; a WhatsApp catalogue for orders. This is where Indian collectors already buy and trade, e.g. the Diecast Collective India crews.
- Amazon.in and Flipkart: search reach for gift buyers. List as "display for 1:64 carded cars". Do not put a car brand in the product name; use it only as a compatibility note.
- Diecast retailers as resellers: Toy Collectors India, Indian Diecast Hub, Zoomsters, Daily Diecast. Bundle a stand with a car purchase, or offer a store display unit.
- Collector meets and expos: live demos sell a side-loading display better than photos; take pre-orders on the spot.
- Launch offer: bundle the Wall 6 with Table Feet at ₹699 to show off the wall-or-desk idea. Under ₹300, Amazon.in charges no referral fee, so Table Feet at ₹199 also work as a cheap first purchase.
