

SlideRack Fold

An open-frame card rack with a fold-out stand, printed in one piece. Cards slide in from the side, the stand flips out to a fixed 35°, and the whole thing folds flat for the shelf or the post.

SlideRack Fold 3, 5 and 6, each loaded with carded 1:64 cars.

Why collectors will buy it

- Shows the card, not the rack. There is no back panel. Each card rests on a slim ledge, and the cards overlap like roof tiles, so the whole card and its art stay visible.
- Swap a car in three seconds. Slide a card in from the open end until it meets the stop, and slide it out the same way. The stand never has to be picked up or taken apart.
- Stands up, folds flat. One flip of the leg and it stands at a fixed, stable lean. Fold it back and the stand is 31–45 mm thick for a drawer, a shelf or a courier box.
- One part, nothing to assemble. The hinge prints already working, so there are no screws, glue or loose pins to lose.

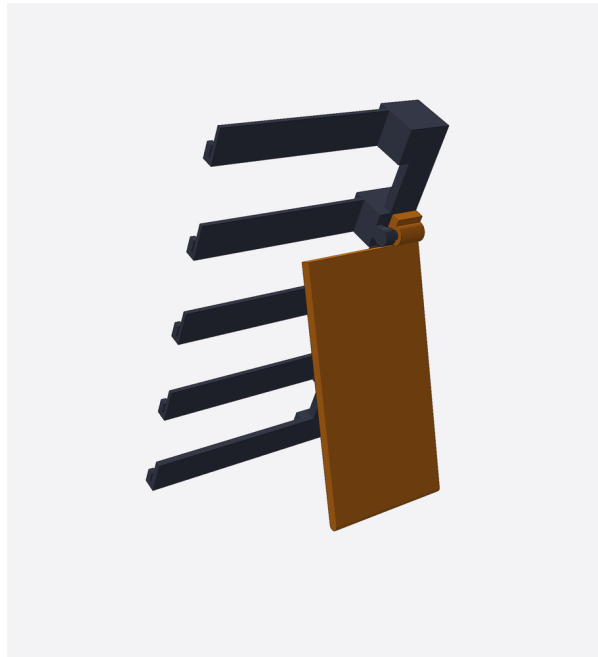

The range

Model	Cards	Size open (W × D × H)	Weight	Price
SlideRack Fold 3	3	136 × 83 × 126 mm	103 g	₹499
SlideRack Fold 5	5	136 × 116 × 231 mm	178 g	₹649
SlideRack Fold 6	6	136 × 131 × 284 mm	207 g	₹749
Fold Duo (3 + 5)	8	both of the above	281 g	₹949

Heights exclude the cards: the top card stands about 145 mm above the rack. Prices include 18 % GST.

How it works

Three moves: open the stand, slide the cards in, fold it away.

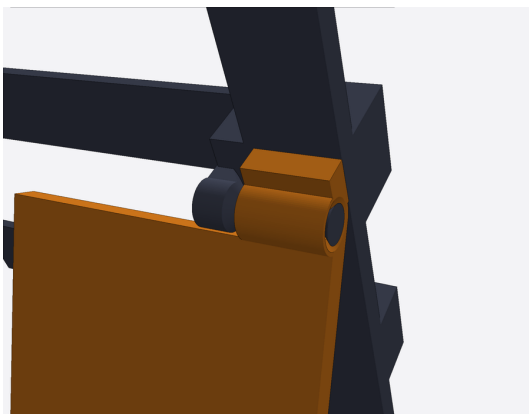

Left: a card sliding in from the open end. Right: the fold-out stand, seen from behind.

1 • Slide-in ledges

- Every ledge has a 1.8 mm groove that holds the card's bottom edge, and a 22 mm back wall that the card leans on.
- Ledges sit 55 mm apart and step 4.6 mm forward each level. Every card clears the one below, and each card stays fully visible.
- Cards go in from the open end and stop against the solid end wall at exactly 108 mm. That fits the standard 108 × 165 mm carded 1:64 blister.

2 • A stand with exactly two positions

- The 80 mm leg swings from flat (0°) to a hard stop at 35°. The rack then leans back 24.5–27.5°, so the cards face the viewer.
- A tab on the hinge lands flat on the end wall, and the rack's own weight presses it shut. Nothing to adjust, nothing to slip.
- Stable when fully loaded: a forward tip angle of at least 21.5°, backward at least 14.6° and sideways at least 12.5°. It survives a nudge on a desk or shelf.

Left: the hinge open at its 35° stop. Right: folded flat for storage or shipping.

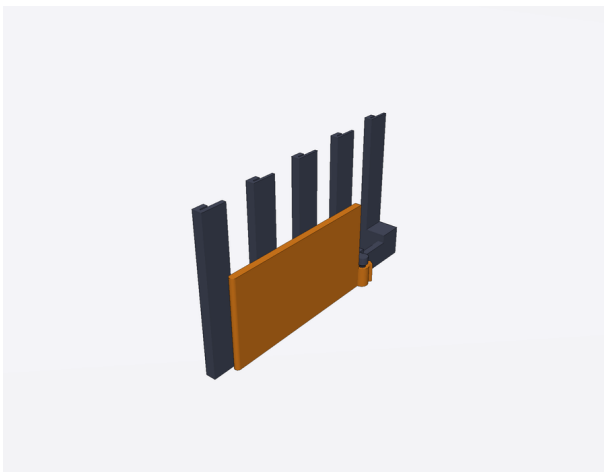

Why it wins

Lighter, faster to make and cheaper than our own base-and-rack set, with no extra parts.

	SlideRack Fold 3	Tabletop Set 3 (base + rack)	SlideRack Fold 5	Tabletop Set 5 (base + rack)
Parts to print	1	2	1	2
Print time*	4.1 h	9.1 h	7.1 h	11.8 h
Unit cost*	₹178	₹390	₹292	₹490
Price	₹499	₹799	₹649	₹999
Folds flat	yes, 31 mm	no (2 pieces)	yes, 40 mm	no (2 pieces)

- 55 % less print time than the 3-card base set, and 40 % less for the 5-card. That means more units per printer per day.
- ₹300–₹350 cheaper for the buyer, while the D2C margin stays at 26–32 %.
- Against the market: carded wall hangers sell at ₹299–₹519 but hide half the card and need drilling. Tabletop racks at ₹349–₹564 hold loose cars, not cards. A 3D-printed 5-rack card stand on Flipkart is ₹1,500; SlideRack Fold 5 is ₹649 and folds flat.
- Gift-ready: it folds flat into a slim box, ships in the cheapest courier slab, and needs no instructions.

Made to be made

- One print, no supports: it prints as it lies, end wall on the bed. There is nothing to remove, sand or assemble.
- A hinge that does not fuse: the leg and pin both start on the bed, the gaps are 0.6–0.8 mm, and every surface above a gap is a 45° cone. A gentle swing frees it.
- Checked in software: no contact even with a 0.45 mm shift, a free swing to 34.8°, a hard stop at 35.0°, and watertight STLs. The blueprint and tolerances are in SlideRack_Fold_Blueprint.pdf.
- Scales with demand: each size is the same design with more ledges, so a print farm runs one job per SKU.

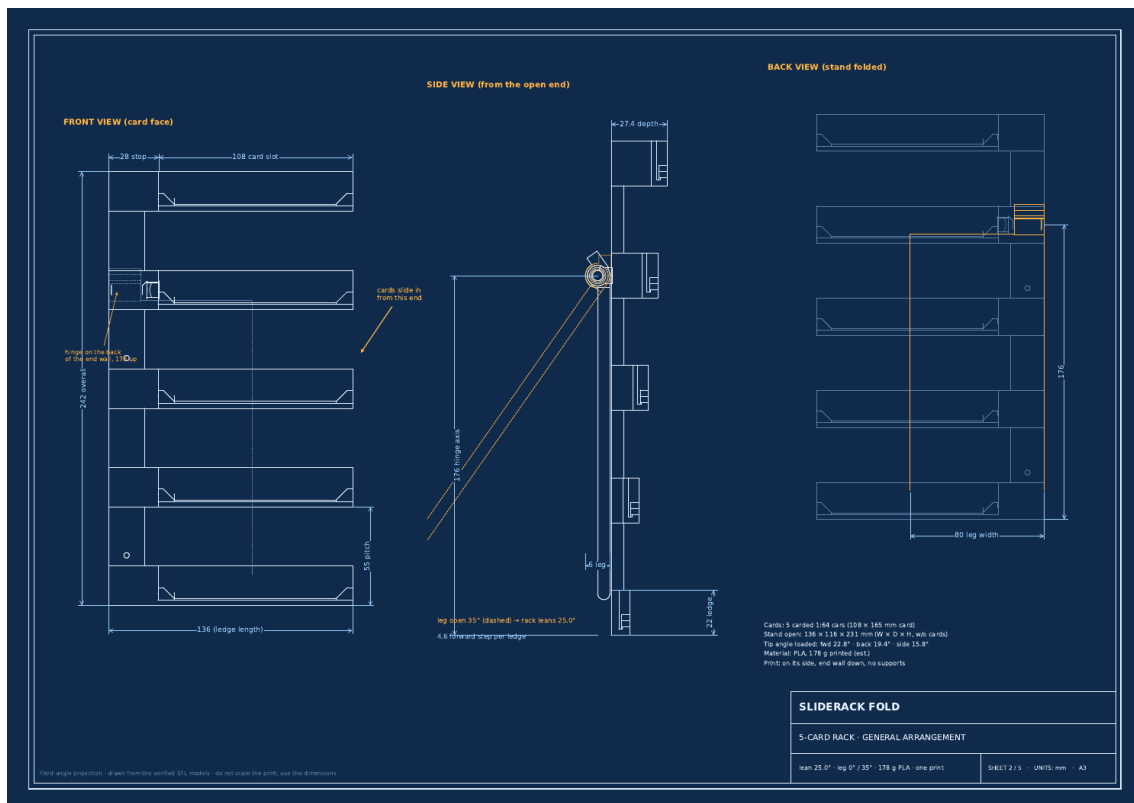

The 5-card model as it comes off the printer: one piece, with the stand folded.

Market, pricing and go-to-market (India)

Priced under the gift threshold, with margin on every channel.

Product	Price (incl. 18% GST)	Print time*	Unit cost*	Profit direct (D2C)	Profit on Amazon / Flipkart
SlideRack Fold 3 (3-card, kickstand)	₹499	4.1 h	₹178	₹135 (32%)	₹70 (17%)
SlideRack Fold 5 (5-card, kickstand)	₹649	7.1 h	₹292	₹145 (26%)	₹61 (11%)
SlideRack Fold 6 (6-card, kickstand)	₹749	8.3 h	₹336	₹184 (29%)	₹86 (14%)
Fold Duo (3 + 5)	₹949	11.2 h	₹470	₹215 (27%)	₹92 (11%)

*Model assumptions: PLA at ₹900/kg (Indian retail ₹699–₹965/kg); printed mass 75 % of the solid model (3 walls, 15 % infill); 25 g/h print rate; machine cost ₹12/h (power + wear); finishing ₹20/part; 10 % waste allowance; packaging ₹30 and shipping ₹70 per order (add-ons ship free with a main item); payment gateway 2 % (D2C) or 15 % all-in marketplace fees; GST 18 % (HSN 3926 under GST 2.0). Profit is after GST, fees, shipping and unit cost.

From the blueprint set: hinge detail, with the gaps that let it print in one piece.

Where to sell

- Instagram + WhatsApp (D2C): short reels of a card sliding in and the 3-second swap; a WhatsApp catalogue for orders. This is where Indian collectors already buy and trade, e.g. the Diecast Collective India crews.
- Amazon.in and Flipkart: search reach for gift buyers. List as "display for 1:64 carded cars". Do not put a car brand in the product name; use it only as a compatibility note.
- Diecast retailers as resellers: Toy Collectors India, Indian Diecast Hub, Zoomsters, Daily Diecast. Bundle a stand with a car purchase, or offer a store display unit.
- Collector meets and expos: live demos sell a side-loading display better than photos; take pre-orders on the spot.
- Launch offer: Fold Duo (3 + 5) at ₹949, ₹199 off buying both. It is the natural upgrade for anyone who outgrows one rack.
