DESIGN 03 OF 10

# TESSEL-BLOCK

Faceted triangular pyramids in staggered rows for enhanced traction.

## THE DESIGN

A tessellation of triangular pyramids. Traction comes from many small angled edges rather than one deep texture, and up-pointing pyramids stand taller than down-pointing ones, giving a two-level, gem-like surface.

TALLEST APEX

## THE HANDLE

A sleeve that slides over your paddle's flat handle: a 30.2 × 16.2 mm slot (the measured 30 × 16 mm tongue plus 0.2 mm), 130 mm deep so the paddle seats fully, with a 5 mm base and a counterbored 3.5 mm hole that takes an M3 cap-head screw flush. The top 25 mm is solid; a sealed hollow core lightens the rest. The outer shape is the same on all ten designs.

| 135 mm | 30 × 16 mm | 130 mm | M3 cap |

| LENGTH | PADDLE SLOT | SLOT DEPTH | SCREW, FLUSH |

## CHOOSE YOUR COLOUR

DESIGNER'S PICK: SUNSET ORANGE

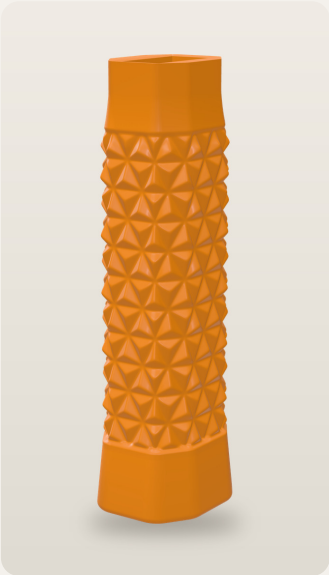

# Tessel-Block, all round.

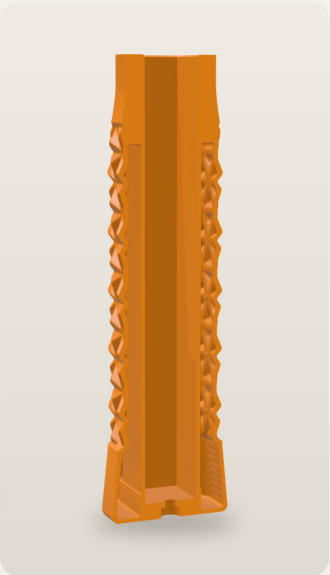

Four views, four surfaces and the idea behind the design. Shown as it prints: one solid PLA colour.

## DESIGN INSPIRATION

Cut gemstones and folded paper. A faceted pattern catches the light at dozens of angles, and under the fingertips each small pyramid is a tiny step your skin can grip.

## WHY IT GRIPS

- 11 rows of 24 triangles with sharp V-grooves
- Up-pyramids reach 3.44 mm, down-pyramids 3.04 mm
- Every facet slope stays under 45°

**PRINT TIP**

*Facet slopes stay below 45°, so the pyramids print cleanly without supports.*

## THE WHOLE COLLECTION

The paddle in the illustration is generic, drawn with your 30 × 16 mm handle. Every design prints in any of the ten PLA colours shown on page 1. 100 % infill · 0.20 mm layers · upright, butt end down.
