

Pick any car. Nothing else moves.

Stacked card racks make you unload every car above the one you want. The FanOut rack spreads your carded die-cast cars side by side on a fold-out frame, so every car is fully visible and any single card lifts off its own hook.

Lift one card straight off its hook. The rest stay put.

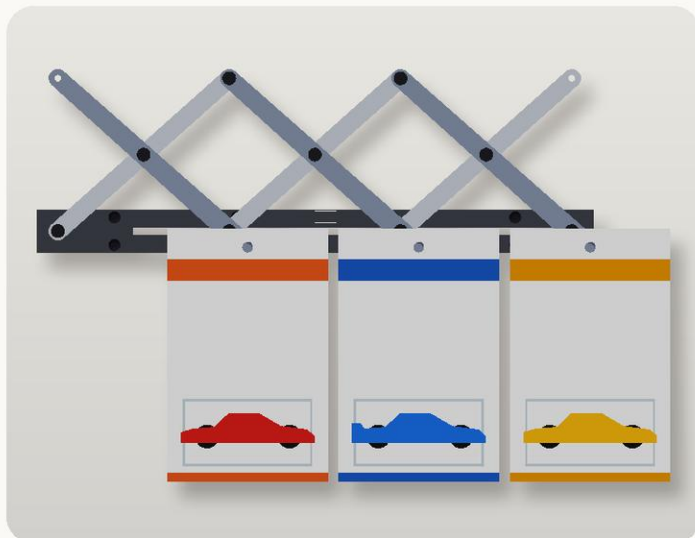

A printed peg through the card's hang hole.

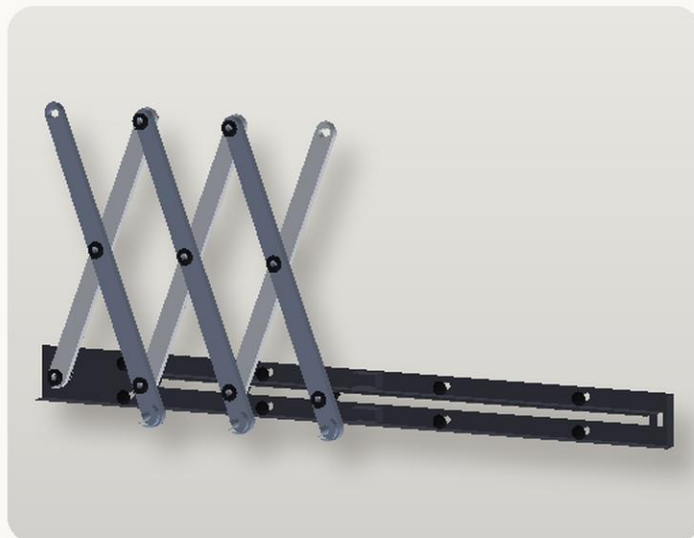

Why collectors choose it

- 1 Any car out, instantly**
Each card hangs on its own hook. No unstacking.
- 2 All cars on show**
Cards sit side by side; no blister is hidden.
- 3 Level and steady**
The lower row rides in a rail, so every hook stays level.
- 4 Simple and repairable**
3 printed designs and standard M4 bolts.

Two sizes. One simple mechanism.

3-car rack, front view.

Frame closed, cards off, for storage.

5 Prints without supports

Fits a 300 mm bed. The long rail comes in joined segments.

7 Wall-ready

Countersunk screw holes in the rail; no extra bracket.

6 Tested in CAD

Collision sweep over the whole motion, tolerance and load checks.

8 No snaps or springs

Nylon-lock nuts hold every pivot; nothing to break or lose.

Specifications

	3-car	5-car
Rail length	364 mm	588 mm
Hook spacing (open)	112 mm	112 mm
Overall height with cards	about 270 mm	about 270 mm
Depth from wall	about 41 mm	about 41 mm
Printed parts	3 link A, 3 link B, 2 rail	5 link A, 5 link B, 3 rail
Hardware	9 M4 bolts + 9 nuts	15 M4 bolts + 15 nuts
Wall screws	8	12
Card size	105 x 165 mm	105 x 165 mm

Good to know

- Remove the cards before folding the frame closed; cards hang only while it is open.
- Hook position suits cards whose hang hole is about 7 mm; check your cards before ordering.
- Mount into a stud or use wall anchors rated for 5 kg or more.
