

DESIGN 02 OF 10

CELLULAR MOD

Staggered stacked cells, with pockets for optional inserts.

THE DESIGN

A wall of staggered, individually pillowed cells with chamfered edges. About one cell in five is recessed into a pocket, sized to take an optional insert. In a single colour the pockets read as shadow.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

Brickwork and stacked stone. The staggered joints lock every cell to its neighbours, and the recessed pockets add a rhythm, like windows in a wall.

WHY IT GRIPS

- 10 rows × 8 staggered cells with 1.4 mm gaps
- Three cell heights give a subtly stepped surface
- About 22 % of the cells are recessed 0.7–1.2 mm

PRINT TIP

Cell edges are chamfered and nothing overhangs beyond 45°. Inserts are optional and not included.
