

DESIGN 03 OF 10

TESSEL-BLOCK

Faceted triangular pyramids in staggered rows for enhanced traction.

THE DESIGN

A tessellation of triangular pyramids. Traction comes from many small angled edges rather than one deep texture, and up-pointing pyramids stand taller than down-pointing ones, giving a two-level, gem-like surface.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

Cut gemstones and folded paper. A faceted pattern catches the light at dozens of angles, and under the fingertips each small pyramid is a tiny step your skin can grip.

WHY IT GRIPS

- 11 rows of 24 triangles with sharp V-grooves
- Up-pyramids reach 3.44 mm, down-pyramids 3.04 mm
- Every facet slope stays under 45°

PRINT TIP

Facet slopes stay below 45°, so the pyramids print cleanly without supports.
