LOGIC-GRIP

Seamlessly interlocking ergonomic puzzle design.

THE DESIGN

Fifty-six jigsaw pieces tile the grip. Each piece is a shallow pillow separated by fine grooves and locked to its neighbours by mushroom knobs; the knob directions are randomised so no two rows repeat.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

Jigsaw puzzles and the satisfying click of the last piece. The surface looks assembled rather than moulded, and the grooves give your fingers lanes to settle into.

WHY IT GRIPS

- $8 \times 7 = 56$ interlocking pieces
- Mushroom knobs with a 2.9 mm neck and 4.2 mm head
- 0.84 mm grooves, about two nozzle widths wide

PRINT TIP

Grooves are 0.84 mm wide and about 1.6 mm deep.
