

DESIGN 05 OF 10

NEURO-TREAD

A raised neural network over a dimpled adaptive base.

THE DESIGN

A network of 48 neurons joined by curved axon ridges rises to the full 3.5 mm crest, standing proud of a field of small bumps. The ridges guide the fingers while the bump field adds fine grip.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

Neural networks and leaf veins: branching lines that meet at nodes. The ridges read like a map under the palm, while the fine bumps between them work like grip tape.

WHY IT GRIPS

- 48 nodes (8 × 6) joined by curved 1.5 mm ridges
- Bump field on a 2.66 mm hex pitch, 1.4–2.4 mm high
- Network and nodes reach the full 3.5 mm crest

PRINT TIP

Ridges and bumps are gentle slopes, printed in one material.
