

DESIGN 06 OF 10

CARBON MATRIX

A continuous 2/2 twill weave with selective reinforcement patches.

THE DESIGN

A woven-carbon look built as real geometry: every tow rises over and dives under its neighbours in a 2/2 twill. Smooth, slightly raised patches suggest reinforcement where the palm loads the handle.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

Carbon-fibre cloth, the material many paddle faces are made from. The twill is printed rather than woven, so it feels like a fine fabric under the hand.

WHY IT GRIPS

- 60 tows around at a 2.04 mm pitch, 2/2 twill
- Weave relief about 0.4 mm, the finest texture in the set
- Smooth patches stand about 0.5 mm above the weave

PRINT TIP

The weave is the finest texture in the set: 0.4 mm of relief on a 2 mm pitch.
