

DESIGN 10 OF 10

HEXA-MOD

Modular hex pads on four height levels.

THE DESIGN

A honeycomb of individual hex pads, each separated by a 1.7 mm gap and set at one of four heights. The height map is pseudo-random with a gentle swell along the handle; the tallest pads reach the full 3.5 mm crest.

THE HANDLE

A slim sleeve that slides over your paddle handle: closed at the butt, open at the throat, 132.8 mm long and cut to the exact 32.06 × 26.04 mm bore of the reference handle. The fit is identical on all ten designs, so you can swap textures freely. A smooth collar at each end keeps the edges kind to your hand.

DESIGN INSPIRATION

A beehive, and the hexagonal tiles of an old bathroom floor. Six-sided pads pack with no wasted space, and the varied heights mean your fingers find a slightly different edge each time you re-grip.

WHY IT GRIPS

- 12 columns × 11 rows of pads, 10.2 mm across flats
- Four levels: 2.35 / 2.76 / 3.13 / 3.50 mm
- Gaps drop to the 1.2 mm base wall

PRINT TIP

Pads are chamfered on the lower edge so they never overhang beyond 45°.
