THE GRIP COLLECTION

PLA · ONE COLOUR · 13.5 CM

Ten grips.
One perfect fit.

Ten 3D-printed grip sleeves for your pickleball paddle: one shape underneath, ten different surfaces on top. Print each in one solid PLA colour.

THE HANDLE

A sleeve that slides over your paddle's flat handle: a snug 30.2 × 12.2 mm slot (the 30 × 12 mm handle plus 0.2 mm), 130 mm deep so the paddle seats fully, with a solid 5 mm base and a counterbored 3.5 mm hole that takes a low-head M3 cap screw flush. The head is solid, with both short side walls of the slot slit open at the top so the flared throat of the paddle slides in smoothly; a sealed hollow core lightens the rest. The fit is identical on all ten designs, only the surface changes.

64–68 g	13.5 cm	M3 low-head	1 colour

CHOOSE YOUR COLOUR

The whole grip prints in one solid colour. Shown: Tessel-Block, mid-grip.

Ultraviolet	Court Blue	Teal	Pickle Green	Citrus Yellow
#7B4DDB	#2F6FDB	#1FA59B	#5DB83A	#EBCB2E

Sunset Orange	Signal Red	Arctic White	Slate Grey	Jet Black
#F08A24	#D7262E	#ECECE9	#6B7480	#1C1E22

Renders of the print files. Colours are typical PLA filament shades; your spool may differ slightly. Designed to print upright, without supports.

Ten ways to hold on.

Two views and a close-up of every design, shown as it prints: one PLA colour, no paint, no multi-colour swaps.

WHERE THE IDEAS COME FROM

Each design borrows a pattern from somewhere else: braided rope, brickwork, cut gemstones, jigsaw pieces, neural networks, carbon cloth, dragonfly wings, contour maps, river pebbles and honeycomb. Every one is real 3D relief, so it reads in a single colour through light and shadow, and you feel it in the hand.

01 VORTEX GRIP

Braided rope and woven straps: crossing strands that bite into the palm from every angle.

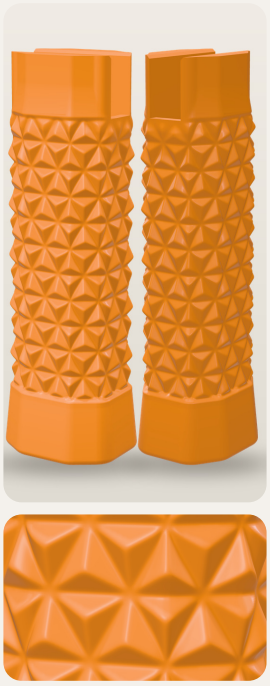

65.8 g · Ultraviolet

02 CELLULAR MOD

Brickwork and stacked stone: staggered cells, with a few recessed pockets for optional inserts.

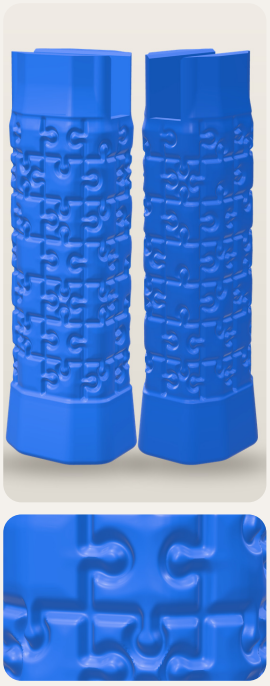

66.1 g · Arctic White

03 TESSEL-BLOCK

Cut gemstones and folded paper: faceted pyramids that catch the light and the fingertips.

65.9 g · Sunset Orange

04 LOGIC-GRIP

Jigsaw puzzles: interlocking pieces with mushroom knobs, every row locked to the next.

67.0 g · Court Blue

05 NEURO-TREAD

Neural networks: nodes joined by curved ridges that rise above a field of fine bumps.

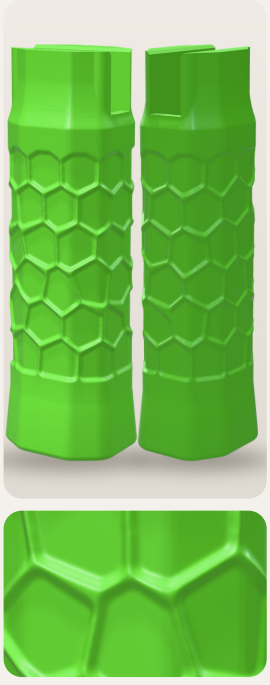

66.1 g · Signal Red

06 CARBON MATRIX

Carbon-fibre cloth: a real over-under twill, the finest texture in the set, with smooth patches.

64.8 g · Jet Black

07 VORONOI-CORE

Dragonfly wings and cracked earth: a lattice of rounded ribs around recessed cells.

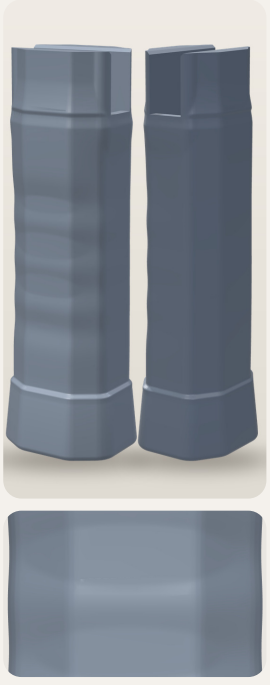

68.5 g · Pickle Green

08 TOPO-FLOW

Contour maps and tree rings: flowing ridges that wrap the handle around four wood-grain knots.

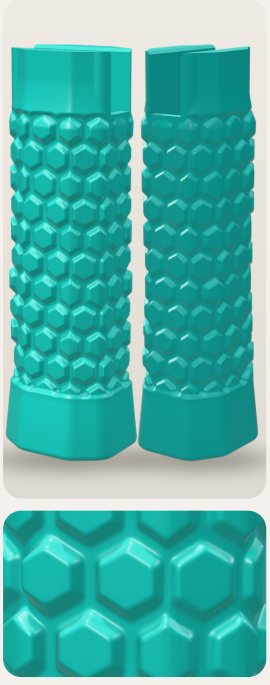

66.3 g · Citrus Yellow

09 ERGO-CONTOUR

A river-worn pebble: a smooth swell with finger flutes and a thumb rest shaped for the hand.

64.1 g · Slate Grey

10 HEXA-MOD

Honeycomb: individual hex pads on four height levels, a pattern you can feel as well as see.

66.1 g · Teal
