ERGO-CONTOUR

A palm swell, four finger flutes and a thumb rest shaped for the hand.

THE DESIGN

A smooth grip shaped for the hand rather than textured: an hourglass swell, a raised palm pad on the back, four finger flutes and a thumb dish on the front. There is no sharp edge anywhere on the surface.

THE HANDLE

A sleeve that slides over your paddle's flat handle: a snug 30.2 × 12.2 mm slot (the 30 × 12 mm handle plus 0.2 mm), 130 mm deep so the paddle seats fully, with a solid 5 mm base and a counterbored 3.5 mm hole that takes a low-head M3 cap screw flush. The head is solid, with both short side walls of the slot slit open at the top so the flared throat of the paddle slides in smoothly; a sealed hollow core lightens the rest. The outer shape is the same on all ten designs.

DESIGN INSPIRATION

A pebble worn smooth by a river, and the cast of a relaxed hand. Instead of texture it offers shape: rests where the fingers fall, and a swell where the palm sits.

WHY IT GRIPS

- Four finger flutes at 44, 58, 72 and 86 mm
- Thumb dish near 97 mm, palm pad near 62 mm
- Hourglass swell 1.73–2.33 mm, peaking near 2.8 mm

PRINT TIP

The smoothest surface in the set, so it shows the least layer texture.

THE WHOLE COLLECTION

The paddle in the illustration is generic, drawn with your 30 × 12 mm handle. Every design prints in any of the ten PLA colours shown on page 1. 100 % infill · 0.20 mm layers · upright, butt end down.
